The Components You Need.

The Knowledge You Trust.

The Service You Deserve.

Since 1970, Specialty Sales has been a stocking distributor of hoses, tubing, couplings and fittings for companies in the water treatment, agriculture, lawn care, beverage and car wash industries. And while we certainly wouldn't say we've seen it all, we've seen a lot. With over 60 years of combined service in the industry, we're able to leverage our knowledge to help you find the right component or solution to solve your problems.

Manufacturing standards matter to us, even for the simplest products. Our dedication to quality products is why you won't find any knockoff or imposter products in our catalog. We wouldn't sell you something that we wouldn't use ourselves.

When you work with Specialty Sales, you'll find that we strive to do more.

TERMS & CONDITIONS

ORDERING: Orders may be placed by phone, email, or through our website. All orders are required to have at the minimum: customer PO number, Specialty Sales' or manufacturer's part number, and quantity. We will verify this information prior to processing the order, and any discrepancies found (e.g. part numbers, pricing) will be listed in your order confirmation email.

PRICING: Catalog prices are List Prices unless otherwise noted. Net prices are based on customer discounts by product category as provided during customer onboarding. Special quotations are available for non-standard, blanket, and custom engineered product orders. Custom sizes, branding, lengths, colors, assemblies, and packaging are often available upon request. All prices are subject to change without notice.

PAYMENT TERMS: A valid credit card is required to place an order, and will be charged upon shipment, unless customer has been explicitly approved for credit. Upon validation of credit references, standard payment terms are 1.5% 15 Days, Net 30 Days. We reserve the right to revoke credit terms at any time and revert to requiring a valid credit card for shipment, particularly for frequently delinquent accounts.

SHIPPING TERMS: All shipments are FOB, Specialty Sales LLC, Lyons, IL.

ROUTING: To be specified by customer on purchase order. Otherwise, we will ship best method.

INTERNATIONAL SALES: All duties and/or applicable bank charges will be added to the order invoice or billed separately to customer.

SHIPPING CLAIMS: If a shipment is lost or damaged, please contact our customer service team within 10 days. We will work with you to file a claim with the carrier and re-ship product if required.

ORDER / SHIPPING DISCREPANCIES: Please inspect all shipments and report any shipping errors, over shipments or shortages to our customer service team within 10 days of receipt.

RETURNS: Items may not be returned without with a Return Goods Authorization (RGA) number. This RGA number must appear on your return shipping label. To be eligible for a return, your item must be unused and in its original condition. Upon receipt and inspection of returned goods, a credit will be issued to your account. Restocking charges may apply. Freight charges will be the responsibility of the customer, except in cases of shipping errors.

WARRANTY: Specialty Sales will assist our customers with any warranty claims under the manufacturer's warranty of the specific product. Specialty Sales offers no additional or supplemental warranty above and beyond the manufacturer's warranty.

OTHER CONDITIONS: Specialty Sales LLC shall not be liable in damages for, nor deemed to be in default by reason of failure or delay in shipment of all or any part of this order caused by war, fire, flood, strikes, lockouts, accident, acts of God, government order or requirement, interruption or shortage of materials or transportation facilities or other cause or circumstance, similar or otherwise, beyond its control.

STOP & READ BEFORE REMOVING WRAP

USE CAUTION WITH A SHARP CUTTING DEVICE

A sharp instrument can easily cut into the hose causing a spot to leak.

MOST HOSE FAILURES ARE CAUSED BY THE COUPLING

To understand how couplings cause hose failures, it is important to first understand how hose is constructed. Hose is made in layers. The first layer is a flexible tube to direct flow. The next layer(s) is yarn braid to give it strength and an outer covering for protection. If the inner tube is folded, snagged or split when a hose barb is inserted and clamps are applied too tight, leaks into the braid may occur, when pressurized.

Even a drop an hour, under pressure, will creep along the braid and raise the cover, forming blisters, which can appear anywhere along the length of the hose. Most hose failures are caused by the coupling, because reusable fittings are used or poor installation of hose barb or clamps, or the hose is abused, or pulled, yanked to the side, causing wear of the metal fitting against plastic.

The use of Hydraulic or Reusable type fittings is not recommended for coupling hose products. The sharp threads on the stem part of the reusable fittings can cut the inner tube causing the fluid under pressure to get between the two layers of the hose. This will cause the outer covering to separate (bubbling) from the inner tube, causing the hose to prematurely fail. The outer covering is designed to protect the inner tube, it is not made to direct chemical flow, nor is it chemical resistant – only the inner tube is resistant.

HELPFUL TIPS

Lubricate the hose barb with a soap and water solution (kitchen detergent is fine) and dip the hose end in as well for added lubrication. **DO NOT USE OIL OR GREASE.** They penetrate and soften the plastic.

Push the barb straight in, with a twisting motion. Rocking it back and forth can snag and tear the tube or cause it to fold inward.

Use the correct size. (Sometimes it isn't obvious). A loose barb allows a crease to form. A barb too large can split the tube.

Do not deform the hose by over-tightening clamps. They may split.

Hoses designed for pesticides are chemical resistant, not chemical proof, which means they may deteriorate over time. Hoses should always be drained and flushed before long term storage, as chemicals will pool at coil bottoms and concentrate through evaporation.

Do not pull a kink through – untwist it. Pulling it through can loosen the layers and allow the individual strands of yarn to shift into an uneven braid pattern, which can result in "BLOW OUTS" through the weak area. Twisted hose tends to kink.

Use Vinyl Guards to protect against accidental "yanking". Vinyl hose guards are plastic sheaths that slide over the fitting and cover 4 – 5" of the hose, providing support to the area of maximum stress.

Style 05R Black – Black PVC Drain Line Tubing

PRICING CODE

2T

**FEATURES:**

- High Quality Industrial Grade Compounds
- Durometer Range Between 65 and 80

APPLICATIONS:

- Drain Lines
- Transfer Lines
- Light Vacuum Lines

TEMPERATURE RANGE:

+25°F to +150°F

NOTES:

Style 10 – Clear PVC Tubing – FDA Grade

PRICING CODE

2T

FDA

FEATURES:

- Complies with FDA CFR 21 for Food Packaging
- Resistant to a Broad range of Chemicals
- Smooth Inner Wall, Excellent Flow Characteristics
- Lightweight, Tough and Aging and Abrasion-Resistant
- Excellent Wearability
- Easy to Connect
- Clear and Flexible

APPLICATIONS:

- Food & Beverage
- Handles a Broad Range of Chemicals, Gases, and Liquids
- General-purpose chemical transfer

NOTES:

Style 20 – Linear Low Density Polyethylene (LLDPE) Tubing

PRICING CODE

2T

FDA

FEATURES:

- Made From Non-Toxic Ingredients Conforming to FDA Standards
- Superior Crack Resistance
- Higher Working Pressure than Conventional Low Density Polyethylene
- Flexible, Lightweight and Durable
- Odorless and Tasteless
- Good Dielectric Properties
- Better Resistance to Stress Cracking than Low Density Polyethylene
- Chemically Inert

APPLICATIONS:

- Air, Water, and Chemical Transfer
- Transportation of Gases, Vapors, and Moisture

TEMPERATURE RANGE:

-50°F to +140°F

Style 20 – Linear Low Density Polyethylene (LLDPE) Tubing

PRICING CODE

2J

FEATURES:

- Wide Range Temperature and Pressure Suitability
- Broad Chemical Compatibility
- Made from Non-Contaminating Materials
- Variety Colors
- Made from FDA Approved Materials
- NSF International Certified
- Chemical Resistance, for Use with Chemicals or Potentially Aggressive Liquids

APPLICATIONS:

- Water Purifications and Conditioners
- Ice makers
- Misting Systems

NOTES:

- Please Ensure Compatibility when Using Cleaning Agents or Other Potentially Aggressive Liquids
- Metric Sizes Available, Please Call.

Style 40 – Fuel Resistant PVC Tubing

PRICING CODE

2T

FEATURES:

- Resists Swelling and Hardening when Exposed to Gasoline, Heating Oils, Cutting Compounds and Glycol-based Coolants
- Transparent Yellow for Easy Identification
- Flexible 65 Durometer (Shore A) Compound
- Similar to TYGON® Formulation F-4040-A

APPLICATIONS:

- Fuel Vent Tubes, Drain Lines, and Overflow Tubes
- Transfer of Gasoline, Heating Oils, Cutting Compounds and Coolants
- For Intermittent Use with Petroleum-based Products
- Lab Handling of Distillates
- NOT intended for use with Foods or Beverages

2T

FDA

FEATURES:

- Ether Based 84 Durometer
- Excellent for Fluid Power and All Areas where Moisture is Present
- Superior Resistance to Hydrolytic Degradation
- High Impact, Abrasion and Tearing Resistance
- Very Flexible and Kink Resistance
- Complies with FDA CFR 21 for Food Packaging
- Pure Polyurethane, Contains No Plasticizers and Low Levels of Extractables
- Clear and Flexible

APPLICATIONS:

- High-purity Applications
- Instrumentation
- Distilled, Deionized, Demineralized or Reverse Osmosis Treated Water
- Handles Petroleum-base Products
- Recommended for Use with Aqueous Solutions

Style 75 – Nylon Tubing

PRICING CODE

2T

FEATURES:

- Excellent Resistance to a Wide Range of Chemicals Including Oils, Gasoline, Hydraulic Fluids, Salt Solutions, and Bases
- Very Low Moisture Absorption, Good Mechanical Properties, and Excellent Electrical Properties

APPLICATIONS:

- Air and Lubrication Lines
- Low Pressure Hydraulic Lines
- Instrumentation
- Process Lines for Chemicals and Solvents

TEMPERATURE RANGE:

-40°F to 225°F

NOTES:

- Available in Natural, Black, Red, Green, Blue, Yellow, and Orange
- Check for Minimum Runs of Other than Natural and Black

SharkBite® Potable Water Pex Pipe

PRICING CODE

2T-SB

**FEATURES:**

- Approved for Use in Both Hot and Cold Plumbing Installations
- Meets the Highest Chlorine Resistance Standards
- Utilizes the Most Energy Efficient Manufacturing Process
- ASTM PEX Standards Certified
- Can Bend Up to Six times the Outside Diameter of the Pipe (The Highest Standard)

APPLICATIONS:

- Domestic Plumbing
- Fire Suppression Systems (Residential Fire Sprinklers)
- Municipal Water Service Pipe for use in Underground Applications
- Radiant Heating Systems for Suspended Floor Systems or in Slab Construction
- Snow and Ice Melt Systems for Sidewalks, Driveways, Entrances, and Ramps
- Turf Conditioning for Greenhouses, Golf Courses, and Sports Fields
- Water Reuse and Reclamations Systems

NOTES:

Available in White, Red, Blue

COUPLINGS MATERIALS

Our line of cam-operating couplings allow for quick connections and disconnections in the field. These couplings are offered in materials below, each with different chemical resistance, temperature and other technical specifications for various applications. Please reach out for a full chemical resistance table and any other technical information you may need. We also offer a line of replacement gaskets in various materials, along with shims. **Note: Please ensure couplings are opened and closed using both handles at the same time for best results.**

NYLON

- Safety latches available on all couplers and dust caps ranging in size from 1¼" to 4"
- Lightweight, ½ the weight of aluminum
- Strong, resists cross threading, thread seizure and "out-of-round" condition
- Chemical resistant to most acids (please contact us for a full chemical resistance table)
- Non-conducting
- All couplers feature stainless steel handles and pins, blue nylon handles available
- Interchangeable with other couplers and adapters manufactured to MIL-spec
- EPDM gaskets furnished standard. Buna-N, Viton® and Nitrile also available
- Temperature range under normal conditions -30° F to 200° F

POLYPROPYLENE

- Safety latches available on all couplers and dust caps ranging in size from 1¼" to 4"
- Chemical resistant to most acids (please contact us for a full chemical resistance table)
- Temperature range from 10° F to 180° F
- All couplers feature stainless steel handles and pins
- Interchangeable with other couplers and adapters manufactured to MIL-spec
- EPDM gaskets furnished standard. Buna-N, Viton® and Nitrile also available

FOOD GRADE GLASS-FILLED POLYPROPYLENE

- Chemically resistant to most acids (please contact us for a full chemical resistance table)
- FDA / NSF compliant
- All couplers feature stainless steel handles and pins
- Interchangeable with other couplers and adapters manufactured to MIL-spec
- Nitrile gaskets furnished as standard. EPDM, Buna-N and Viton® also available
- Good mechanical strength
- Resistance to alkalies, salts and alcohols
- Resistance to animal, vegetable and mineral oils
- Resistance to phosphoric and hydrochloric acids
- Temperature range under normal conditions from 10° F to 180° F

PVC

- Use with PVC pipe
- Easy to install
- Socket solvent weld (cement)
- Stainless steel handles, rings and pins
- EPDM gaskets standard
- Economical
- Weather & corrosion resistant

POLYVINYLIDENE FLUORIDE (PVDF)

- Chemically resistant to most acids (please contact us for a full chemical resistance table)
- Interchangeable with other couplers and adapters manufactured to MIL-spec
- EPDM gaskets furnished as standard. Buna-N, Viton® and Nitrile also available
- All couplers feature stainless steel handles and pins
- Nonflammable and self-extinguishing
- UV stable in the visible spectrum
- NSF compliant
- Temperature range under normal conditions -20° F to 300° F

John Guest Auto-Lock Acetal Push Connect Fittings

PRICING CODE

8J

The PI Range of inch-size push-in fittings is offered for tube sizes 5/32" O.D. to 1/2" O.D. The fittings are manufactured in gray acetal copolymer with food grade nitrile O-ring, making them especially suitable for applicants involving foodstuff and potable liquids. They are also suitable for air and inert gases and can therefore be used in CO2 lines, pneumatic applications and vacuum.

WORKING PRESSURES AND TEMPERATURES:

■ 5/32"-5/16": Max. 230 psi at 68°F, Max. 150 psi at 150°F

■ 3/8"-1/2": Max. 150 psi at 68°F, Max. 100 psi at 150°F

For use with Stainless Steel Tubing

The SI Range of inch-size push-in fittings is offered for tube sizes 1/4" O.D. to 3/8" O.D. Superseal is a special fitting designed to provide extra grip on stainless steel tubes. The Superseal design features a collet with integrally molded stainless steel teeth similar to the standard Super Speedfit design, but incorporating an additional hand-operated nut and wedge shaped plastic washer to apply extra pressure to the collet and the double O-ring seals. This ensures that the collet teeth bite thoroughly into the tube to provide grip, while at the same time compressing the o-rings to further enhance sealing.

WORKING PRESSURES AND TEMPERATURES:

- 1/4"-5/16": Max. 230 psi at 68°F, Max. 150 psi at 150°F
- 3/8": Max. 150 psi at 68°F, Max. 100 psi at 150°F

John Guest Metric Acetal Push Connect Fittings

PRICING CODE

8J

The PM Range of metric-size push-in fittings is offered for tube sizes 4mm O.D. to 28mm O.D. The fittings are manufactured in black acetal copolymer with food grade nitrile O-rings. Especially produced for foodstuff and potable liquids, they are equally suitable for air and inert gases and can therefore be used on CO2 lines, pneumatics applications and vacuum.

WORKING PRESSURES AND TEMPERATURES:

- 4mm-8mm: Max. 230 psi at 68°F, Max. 150 psi at 150°F
- 10mm-22mm: Max. 150 psi at 68°F, Max. 100 psi at 150°F

John Guest Polypropylene Push Connect Fittings – White

PRICING CODE

8J

The PP Range of inch-size push-in fittings is offered for tube sizes 1/4" O.D. to 1/2" O.D. The fittings are manufactured in white polypropylene with food grade EPDM O-rings. They have been developed to satisfy the filtered pure water market and wide range of applications.

The PPM Range is NOT suitable for compressed air applications.

WORKING PRESSURES AND TEMPERATURES:

- Max. 150 psi at 70°F (Max. 10 Bar at 20°C)
- Max. 60 psi at 140°F (Max. 4 Bar at 60°C)
- Min. 33°F/1°C

John Guest Speedfit Plumbing Fittings – White

PRICING CODE **8J-PF**

The PEI Range of Twist & Lock Fittings is offered in 1/2" - 1" CTS sizes. They have been specifically designed for Plumbing and Water Filtration/Softener Installs. However, they are also suitable for Marine and R.V. applications. The fittings are manufactured from high quality engineered plastic with EPDM O-rings and are suitable for hot and cold water plumbing applications.

For use with Copper, PEX, and CPVC Pipe

John Guest ProLock Plumbing Fittings

PRICING CODE **8J-PL**

JG ProLock™ fittings have a collet with stainless steel teeth that grip the pipe when fully inserted, and an o-ring to provide a permanent, leak-proof seal. When twisted into place, the locking cap locks the pipe in place, ensuring maximum security. No tools, soldering, clamps or glue are ever required.

“The range of ProLock Twist-to-Lock fittings is offered in 1/2” to 1” CTS sizes. They have been specifically designed for the Professional Plumber. The fittings are manufactured from high quality engineered plastic with EPDM O-Rings. ProLock Twist-to-Lock fittings are suitable for hot and cold water plumbing applications.”

Max Pressure: 160 psi at 73° F.

For use with Copper, PEX, and CPVC Pipe

SharkBite® Brass Plumbing Fittings

PRICING CODE **8J-SB**

The SharkBite system includes a wide range of plumbing fittings, valves, PEX pipe, outlet boxes and other plumbing accessories, making it the only system that is a total end-to-end plumbing solution from meter to fixture. This means compatibility and peace of mind quality that is backed by a single manufacturer.

FEATURES:

- Lead-Free - All SharkBite fittings are made from Lead Free DZR brass
- Versatile: Compatible with copper, PEX, CPVC, PE-RT, HDPE, Polybutylene, and PVC piping.
- Flexibility: Can be rotated after assembly allowing for easier installation in tight spaces
- Behind-the-Wall: Approved to be used underground and behind walls without access panels
- Max Pressure: 200psi
- Certified to NSF/ANSI 61 and ASSE 1061 product standards for use in potable water and hydronic heating water distribution

	8SB RUC100340	U060LF	1" X 3/4"	6	\$ 28.50
SLIP COUPLINGS 	(SLIP END ONLY SUITABLE FOR COPPER AND CPVC) Slip couplings are the most efficient way to repair a burst pipe or leak. Slip fittings simply repair by doing the job that two couplings and extra pipe used to do. Only one end of the coupling has a stop, allowing the opposite end to slide freely over the end of a pipe. The fittings can then be released with a disconnect tool and slid back onto the other end of the pipe for a successful connection and leak repair.				
	8SB SC120	U3008LF	1/2" X 1/2"	3	\$ 21.50

FEATURES:

- No tools required—connect and disconnect without tools for easy and flexible installation.
- Locking clip—for extra connection security.
- NO flow restriction—no pipe stiffeners for copper and CPVC pipes allows for full flow without additional head losses.
- Rotate under pressure—for Brass, Mini, and Plastic fittings.
- Zero-leak patented O-ring guide for Plastic Series—protects the O-ring from damage during connection, helps align the tubing with the O-ring every time, and prevents the O-ring from becoming dislodged.

Schedule 80 Polypropylene Pipe Fittings

PRICING CODE

8T

The Polypropylene Pipe Fitting has a working pressure up to 15 PSI at 70°F. It is available in Heavy Duty (Schedule 80) and precision molded NPT Threads. The pipe fitting is manufactured with reinforced polypropylene, lightweight with high strength, and excellent chemical resistance.

FEATURES:

- Glass reinforced polypropylene
- Heavy duty (Schedule 80)
- Lightweight with excellent strength
- NPT threads
- Excellent chemical resistance

"F" Series Punch Type Clamps

PRICING CODE

5F

Preformed Clamps are double wrapped and formed to a given diameter. Used primarily where one end of the hose or article is free to allow the clamps to be slid over the hose end before the fitting is inserted. Preformed clamps range in size from 13/16 inch I.D. to 8 inch I.D.; all clamps may be pulled down to a smaller diameter but cannot be adjusted to a larger diameter.

Open End Clamps are of the same general construction as the preformed clamps with this exception, the double wrapping of the band around the hose or article is a part of the application. The open end clamps are used when one end or both, of the article to be clamped is not free, or an obstruction prevents slipping a preformed clamp over the end. Open End Clamps range in size from 13/16 inch I.D. to 48 inch I.D. Galvanized Preformed Clamps 2 1/2 Inch I.D. and above, and 5/8" wide open end clamps have a stainless steel lok for greater strength and rigidity.

“K” Series Universal Clamps

PRICING CODE

5F

K-Clamps may be secured by either a punch or fold-up method.

Less tension loss. Patented hole in inner band gives better internal mechanical locking after punching.

Preformed Clamps are available in sizes ranging from 13/16” to 8” I.D.’s. The 3/4” width sizes range from 2” to 8” I.D.’s. Each clamp is a double wrapped metal band formed to a given diameter. The clamp is designed to be slid over the hose end before the fitting is inserted. A punch-type or fold-up tool is then used to apply the clamp.

POW'R-GEAR® 60 High Performance Clamps

PRICING CODE

5I

FEATURES:

- Designed for High Vibration and Stubborn Leakage Applications
- Extra Wide 5/8" Heavy Gauge Band and a Wide Profile Housing that Provides Maximum Engagement of Screw Threads to Band
- Engineered to deliver exceptionally high rates of band tension to handle the toughest sealing jobs.
- Installation Torque: 75 to 90 in-lbs (8.5 to 10 Nm)
- Available in additional materials, including marine grade stainless steel

APPLICATIONS:

- Industrial Machinery
- Heavy Truck
- Farm and Off-road Equipment Engines

MATERIAL SPECIFICATIONS:

- Screw: 5/16" Hex Head; 410 Stainless Steel
- Housing: 304 Stainless Steel
- Band: 5/8", 304 Stainless Steel

IDEAL T-Bolt Clamps

PRICING CODE

5X

Nominal Diameter Sized T-bolt clamps provide uniform sealing pressure for a positive, reliable seal. Designed for use in high vibration and large diameter applications common in heavy trucks, industrial machinery, off-road equipment, agricultural irrigation and machinery. Easy to interchange competitors part numbers.

STYLE C-S FEATURES:

- 1/4" T-Bolt in Plated Carbon Steel
- 7/16" Hex Nut in Plated Carbon Steel w/ Nylon Insert
- 3/4" Band, Bridge, and Trunnion in 301 Stainless Steel

STYLE N-S4 FEATURES:

- 1/4" T-Bolt in 304 Stainless Steel
- 7/16" Hex Nut in 304 Stainless Steel w/ Nylon Insert
- 3/4" Band, Bridge, and Trunnion in 301 Stainless Steel

Oetiker StepLess® Ear Clamps

PRICING CODE

50

FEATURES:

- Special design eliminates steps and/or overlaps on the inner circumference of the clamp for a 360° leak-free seal.
- Because the tongue resides in a groove, the “tongue-in-groove” feature exerts pressure on the assembled parts over 360°, enabling the clamp to apply a continuous radial force completely around the connection’s diameter.
- 360° StepLess®: uniform 360° compression and uniform surface pressure
- Narrow band: concentrates transmission of clamping force, less weight
- Clamp ear: compensates for component tolerances, adjustable surface pressure
- Dimple: increases clamping force, spring-effect compensates for changes in diameter due to thermal expansion
- Specially formed strip edges: reduced risk of damage to parts being clamped
- Prices on larger sizes available on request

PRICING CODE

6J

The PPSV Range of Shut-Off Valve is offered for tube sizes 1/4" O.D. and 3/8" O.D., produced in polypropylene and fitted with EPDM O-rings. Polypropylene has the advantage of being more chemically resistant than acetal. The valves are for use with potable water.

FEATURES:

- White Body with Blue Handles
- Pressure Rated 150psi
- Working Temp. 33°F - 150°F
- Food Grade Polypropylene, EPDM O-Ring & Acetal Collet
- With Stainless Steel Grippers

APPLICATIONS:

- Suitable for Medium Pressure
- Ideal for Use in Pure Water Applications

Specialty Valves: Polypropylene Check Valves

PRICING CODE

6S

FEATURES, APPLICATIONS AND NOTES:

- The 685/687 series polypropylene check valve operates in any position, horizontal or vertical.
- Standard cracking pressure less than 1 psi with a maximum operating pressure of 125 psi.
- Easily disassembled for repair or replacement of seals.
- Stainless steel spring, with guided polypropylene poppet. Hastelloy springs available.

Polypropylene Ball Valves

PRICING CODE

6T

FEATURES:

- Precision molded polypropylene is reinforced with fiberglass for additional strength
- FKM seals
- Self-aligning ball moves freely against the PTFE seats for smooth operation. The valve opens and closes with very little pressure on the handle
- Ball is diamond turned, after molding, to make it spherically perfect, which provides precise contact between ball and seats
- PTFE self-lubricating stem bushings and seats cannot stick or bind
- Stainless steel bolts

In-Line Strainers

PRICING CODE

9R

FEATURES:

In-line strainers have been the industry standard for cost effective straining and filtering since they were first introduced over thirty years ago.

APPLICATIONS:

- Agricultural Sprayers
- Pressure Washers
- Floor Scrubbers
- Pre-Filters
- Not for use with residential water systems.

Calculate your part number using the key below. 9R should precede your part number. (SAMPLE: 9RN02520VCLPMXM)

Suction Screens

PRICING CODE

9R

FEATURES:

- We offer a line of PVC* suction strainers in various connection and mesh sizes.
- Our PVC suction strainers are rated for a maximum temperature of 120° F.

APPLICATIONS:

- Pool and Spa Equipment
- Water Softeners
- Floor Cleaning Machinery
- Pressure Washers
- Car Wash Equipment

*Nylon available, call for pricing and availability.

PTFE Thread Tape

PRICING CODE

9T

FEATURES:

- Provides a highly resistant seal on pipe threads for all types of service.
- Permits easy disassembly after years.
- Meets Mil. Spec. T-27730A.
- Made of pure white "Teflon" (Non-Toxic)

APPLICATIONS:

- Suitable for use with solvents, chemicals, oxygen and on food lines.
- Pressures to 2000 PSI.

TEMPERATURE RANGE:

-450 F to +550 F

	PART #	DESCRIPTION	SIZE / PACKAGING	LIST PRICE
EP Bearing Grease™ 	9X30350	Industrial Grade • 0°F to 325°F (-18°C to 163°C) • Superior Rust & Corrosion Protection • Dropping Point - 390°F (199°C) • Lithium 12-Hydroxystearate Base • Color - Purple • Highly Adhesive to Metal • NLGI Grade 2 EP BEARING GREASE is an all-purpose lithium grease containing extreme-pressure and boundary lubricants. The additive package enhances the shear stability, lubrication properties and high temperature characteristics of lithium-based grease, making EP BEARING GREASE a versatile, cost-efficient, multipurpose grease. EP BEARING GREASE is water resistant, highly tenacious, and has excellent resistance to the effects of salt spray, heat, water, oxidation, high loads and other adverse conditions common to industrial usage. It is a stable, high-temperature grease. Specially formulated for use on roller bearings, anti-friction bearings, journals, and is particularly useful where a single, multipurpose product is desirable.	14 oz Cartridge	\$ 24.96
ALCO-EP-73 Plus Grease™ 	9X37750	Premium Multipurpose Grease • -20°F to 450°F (-29°C to 232°C) • Superior Rust & Corrosion Protection • Dropping point - 500°F (260°C) • Polymer Additives for Extreme Water Resistance • Color - Red • Exceeds Military Spec MIL-G-18458B-SH ALCO-EP-73 PLUS is a premium, state-of-the-art, multipurpose, aluminum complex grease containing a highly synergistic blend of rust and oxidation inhibitors plus extreme pressure and anti-wear additives for maximum performance characteristics. ALCO-EP-73 PLUS also contains polymer additives, further enhancing the inherent water resistance of an aluminum complex based grease. This multipurpose grease is extremely resistant to rust and corrosion and suited for use in high moisture areas. It's specially formulated and developed for subsea or other conditions where extreme water resistance is necessary. The highly developed additive package makes ALCO-EP-73 PLUS the premier, multipurpose grease for hostile environments.	14 oz Cartridge	\$ 28.11

	PART #	DESCRIPTION	SIZE / PACKAGING	LIST PRICE
FMG Food Machinery Grease 	9X30150	• 0°F (-18°C) to over 400°F (204°C) • NSF H1 Rated • Non-Pound Out Formula • Bacteriostatic Agent • Anti-wear Additives • Color – White FMG is specifically designed for use in the food processing industry where it may have incidental food contact. FMG has been formulated to perform in a wide variety of operating conditions. It is extremely water resistant and will remain in place even after frequent wash downs. FMG's polymer additives provide adhesive/cohesive strength to protect against pound-off when shock loads are encountered. For slower speeds, higher loads or greater adhesion and water resistance. FMG is also available in an ISO 460 grade. FMG is recommended for the lubrication of roller, needle, ball, journal, and sliding bearings in the food processing and handling industry.	14 oz Cartridge	\$ 30.12
Arctic™ Extreme Low Temperature Grease 	9X35050	• Extreme Cold Temperature Grease -65°F to 225°F (-54°C to 107°C) • Dropping Point of 285°F (141°C) • Contains No Solid Additives • Extremely Resistant to Salt Spray • All Temperature Formula Effective Winter or Summer • Water Resistant • Rust & Corrosion Resistant • Color - Amber ARCTIC is particularly suitable for use in extreme cold environments such as cold rooms, cold storage lockers, ice plants, and on refrigeration or cold storage equipment. It will resist such environmental contact as humidity, ice, and road salts without hardening, washing off or deteriorating. ARCTIC is an excellent service grease that has passed the Shell Roll Test for 100 hours at 150°F (66°C), and the Federal Test Method Standard No. 791B, Method No. 3454.2 "Leakage Tendencies of Automotive Wheel Bearing Greases" and ASTM 1263. It also passes the application salt-spray resistance and rust tests required by the United States government for its severe environmental contact greases. ARCTIC may be used on automobiles and aircraft, in industrial applications, or anywhere lubricating properties of a moderate to severe nature are required over a wide range of temperatures.	14 oz Cartridge	\$ 25.87

Silicone Compound DM™ 	9X73560	Dielectric Grease • NSF H1 Registered #132224 (DM-3), #132225 (DM-2) • Water Resistant • Nontoxic/Safe • Wide Temperature Range • Extremely Chemical Resistant • Translucent Paste • Highly Resistant to Oxidation & Shear Breakdown • Suitable for Valve Lubrication • Dielectric Strength - 500 volts/mil typical • Conforms to: MIL-S-8660C (DM-3), MIL-C-21567A (DM-2), NATO Code #S-736 • Standard NLGI 3 SILICONE COMPOUND DM is a premium silicone compound for use in a wide variety of applications. Its low volatility, non-melting thickener and high dielectric strength make it the compound of choice for moisture proofing ignition systems, spark plug connections, electrical assemblies, cable and battery terminals and other similar applications. In the higher NLGI grades, SILICONE COMPOUND DM provides excellent lubrication and sealing properties for plug and gate valves, stuffing boxes, o-rings, vacuum and pressure systems. The low volatility and inert properties allow it to be used on a wide range of elastomers and plastics. It is not recommended for use on surfaces to be painted. Excellent for high temperature bearings, conveyor systems, and low-temp refrigeration systems.	5 oz Tube	\$ 59.05

Anti-Seizes

PRICING CODE

9X

	PART #	DESCRIPTION	SIZE / PACKAGING	LIST PRICE
KOPR-KOTE® Anti-Seize and Thread Lubricant 	9X10002	• -65°F to 1800°F (-54°C to 982°C) • NSF H2 Registered • MIL PRF-907F • Raytheon-Spec M8656839 Type I • Load Rating -80,000 psi • Friction Coefficient (K-factor) -.15 • 10% Pure Metallic Copper Flake • No VOC • NSN #8030-01-239-8703 • Not Classified as a Marine Pollutant • DOT Approval CA2004080025 KOPR-KOTE is a combination of copper flake, graphite and other extreme pressure additives, blended into a food grade grease base that helps properly distribute all the components on the surface of the fastener or the metal surface needing lubrication. This particle distribution is necessary to achieve the .15 K-Factor and aids in the break out process by reducing metal-to-metal contact that can cause friction, heat and damage to the threaded surface.	1/2 lbs Brushtop Can	\$ 38.83
550® Extreme Anti-Seize 	9X47102	Non-Metallic Petrochemical-Grade Anti-Seize and Thread Lubricant • -65°F to 1200°F (-54°C to 648°C) • MIL PRF-907F • Friction Coefficient (K-Factor) – 0.15 - 0.17 • Blend of Molybdenum Disulfide & Special Oxidation Resistant Graphite • No VOC 550 EXTREME ALL-WEATHER offers the same performance and package of solid lubricants, such as 550 EXTREME but with a new and advanced synthetic grease base carrier. This grease offers exceptional brushability down to 40°F/40°C and carries a flash point of over 500°F/260°C. For an anti-seize compound to work effectively, it needs to be properly applied to the threads. Standard petroleum oils will harden significantly below 10°F/-12°C making this application difficult. 550 EXTREME ALL-WEATHER's base grease is a blend of synthetic fluids with pour points no higher than -50°F/-46°C, thickened with a calcium sulfonate complex to provide better rust and corrosion protection. This unique combination makes for an excellent product in low temperature environments but equally as good in high temperatures.	1/2 lbs Brushtop Can	\$ 52.88

*Additional sizes and packaging available.

White Knight™ Anti-Seize 	9X16402	Food Grade Anti-Seize Thread Lubricant • -65°F to 1800°F (-54°C to 982°C) • Color - White • NSF H1 Registered • FDA REG: CFR 21 part 178.3570 • MIL-PRF 907E • Load Rating - 80,000 psi • No Metallic Content WHITE KNIGHT is a non-drying, synthetic fortified thread lubricant. It protects and lubricates metal parts and threaded fasteners from rust and corrosion up to 1800°F (982°C). WHITE KNIGHT incorporates the bacterial fungi static agent propyl paraben which is widely used in the food lubricant industry. Ideal for use on threaded fasteners for food processing equipment, threaded bottle filling heads, and baking oven chain drives. WHITE KNIGHT is also effective on stainless steel, aluminum, iron galvanized fittings and plastic/nylon components.	1/2 lbs Brushtop Can	\$ 43.43

	PART #	DESCRIPTION	SIZE / PACKAGING	LIST PRICE
769® Lubricant 	9X37341	Nonflammable Penetrant/ Lubricant/Moisture Displacer/ Protectant • NSF H2 Rated • 35KV Dielectric Strength • Nonflammable • Nonevaporating • Contains No Silicones • NSN #'s – 9150- 00-261-789, 8030-99-923-1633, 8030-00- 181-7603 • MIL-C-81309 Type II & III, Class II, CO2 Grade (Aerosol) • MIL-C-81309 • Type II & III, Class I (Bulk) • MIL-C-16173E Grade 3 • MIL-C-23411A, VV-P-216B 769 LUBRICANT is the leading lubricating, penetrating, moisture displacing, and corrosion preventative coating on the market. Unequalled where salt water, salt spray or other harsh environments are present. 769 LUBRICANT gives total performance while being environmentally safe, easy to use and nonflammable. Lubricates: Contains ashless, extreme pressure additives and highly refined lubricating oils that provide superior lubricating protection and anti-wear properties. Penetrates: Rusted and frozen metal parts – studs, nuts, screws, pins, linkages are easily loosened by means of superior “creepability.” Removes Moisture: Moisture is lifted and displaced rather than trapped. Pores and crevices of surfaces are freed from moisture and are coated with a thin, non-greasy film that prevents additional moisture from clinging or entering. Prevents Rust & Corrosion: Thin film adheres to metallic surfaces, providing positive, temporary protection against the formation of rust and corrosion, including electrolytic and galvanic corrosion common in salt environments.	12 oz Aerosol	\$ 33.08

Z-Plate™ Galvanizing Compound 	9X60541	Zinc-Rich Galvanizing Compound • Fast Evaporating • Color - Grey • Cone Spray Water Displacing • Dry Film • Long-Term Coating • 95% Pure Metallic Zinc • Rust & Corrosion Inhibited Z-PLATE Prevents: Rust and corrosion with galvanic action equal to hot-dip galvanizing. 95% pure zinc compound which forms a tough, durable and flexible coating. Z-PLATE Repairs: Galvanized surfaces damaged by cutting or welding. Primer for surfaces to be painted. Protects against salt water. It requires little surface preparation. Z-PLATE is excellent for cosmetic repairs to welded joints, guard rails, bridges, fencing, storage tanks, pipe lines, TV towers, metal buildings, heavy equipment, heat ducts, marine and offshore equipment.	14.75 oz Aerosol	\$ 41.78
Rust-Guard Rust Inhibitor 	9X13241	• Contains No Fluorocarbons • Indoor & Outdoor Formula • MIL-PRF-16173E RUST-GUARD is a specialized water displacing formula which dries to a uniform, thin waxy film to effectively seal out moisture and corrosion. RUST-GUARD provides long-term protection on all metal and alloy surfaces, even under harsh environmental conditions such as water, high humidity or salt spray. RUST-GUARD's bulk formula typically provides six months outdoor and one year indoor protection against rust and corrosion. RUST-GUARD may be used indoors or outdoors as a protective coating on raw materials, machined parts, tools, pipe, fittings, valves, etc., while they are being stored or in transit. RUST-GUARD will not crack or flake off, it penetrates fully into even the smallest crevices to displace moisture and prevent rust and corrosion. RUST-GUARD is green in color to provide a visual check of product application and is easily and safely removed by use of a safety solvent such as CLEAN-UPTM.	11 oz Aerosol	\$ 36.07

	PART #	DESCRIPTION	SIZE / PACKAGING	LIST PRICE
Clean-Up Plus™ 	9Z72542	Citrus Degreaser • NSF C1 Rated • Replaces 1:1:1 Trichloroethane • Nonflammable Propellant • Natural Organic Formula • Ozone Friendly • Biodegradable • 29KV Dielectric Strength CLEAN-UP PLUS is a high-performance blend of safe, organic solvents that quickly dissolves and rinses away dirt, grease, grime, oil, tar, and wax, while being both environmentally safe and ozone friendly. It works immediately on contact, breaking down and dissolving even the most stubborn contaminants without the use of fluorinated, chlorinated or SARA listed ingredients. CLEAN-UP PLUS slowly evaporates while cleaning, leaving a residue free surface. This degreaser is safe on all metals and most plastics.	15 oz Aerosol	\$ 29.72
Easy-Clean® Liquid 	9X30033	Alkaline-Based Concentrate • Biodegradable • Nontoxic • Nonflammable • Noncombustible • Nonfuming • Water Soluble EASY-CLEAN LIQUID is an alkaline-based cleaner/degreaser that uniquely combines cleaning agents with newly developed emulsifying technology to provide a product that can effectively remove carbon, grease, oil and other organic deposits while being both safe and ozone friendly. It contains no 1:1:1 Trichloroethane, Fluorocarbons or SARA Title III, Section 313, Part 372 listed ingredients and contains no acids, chlorides, phosphates or TTO's (Total Toxic Organic Compounds). EASY-CLEAN LIQUID is the most effective cleaner/degreaser for heavy-duty industrial services on the market and can be used for parts degreasing, pressure washing, steam cleaning, ultrasound cleaning, or simply by brushing or spraying and then rinsing with water or wiping clean. For best results, combine a 5-gal. pail of EASY-CLEAN LIQUID with water in a 55-gal. drum.	8 lbs Jug	\$ 73.95

Thread Sealants

V-2® Thread Sealant

9X35502

Multipurpose Pipe Thread Sealant with PTFE

- Rated: 70°F to 500°F (-57°C to 260°C)
- NSF 61 Certified
- #21265
- Uniform Plumbing Code: IAPMO #1282
- Biodegradable
- MIL-TT-S-1732
- No VOC
- Seals to 10,000 psi
- Friction Factor - 0.07
- Brushable to 0°F
- Contains PTFE
- Safe to use on PVC & Fiberglass Fittings
- No Odor

V-2 is a combination of vegetable oil, PTFE and inert fillers that are environmentally safe, nontoxic for use in potable water applications, on NPT and standard pipe fittings. It's a soft setting product, so you can remove the fitting without damage to the threads. This formulation also has rust and corrosion inhibitors built in so the connection/fitting will not rust or corrode. V-2 also has a bacteria/fungistat which is a food grade additive that will eliminate bacterial culturing.

Food Grade Silicone Food Grade Lubricant

9X50641

- NSF H1 Registered
- FDA Regulation CFR-21, Part 178.3570
- Nontoxic
- Safe on plastics
- Nonstaining
- Colorless/ Odorless
- Excellent Release Agent
- Authorized for use by Agriculture Canada
- Contains No 1:1:1 Trichloroethane, Freon

FOOD GRADE SILICONE is an excellent lubricant for use on processing equipment in all types of food and food related industries where incidental food contact may occur. FOOD GRADE SILICONE stops sticking, squeaking and binding of moving parts. It has a excellent release agent. FOOD GRADE SILICONE will not gum or form unwanted residues, instead it leaves a clear film that is moisture resistant, long-wearing, odorless, colorless and nontoxic.
